Glass
Toughened

Laminate
(optional)

Printer bed size and maximum panel to print

3.6m x 2.5m

Multi-pane printing option for large scale designs

Fonts & Typeface:

All fonts/typefaces must be embedded or outlined otherwise they will be substituted

File Format:

PDF files (high resolution)

InDesign and Illustrator files to be packaged with embedded fonts, images

All spot colours converted to RGB colour space.

TIFF, jpeg, png accepted

PSD format with layers unlocked and separated

Please send through artwork via dropbox or wetransfer.com rather than through an email as this will lower quality.

Colour Mode:

All artwork to be submitted as RGB
we then translate this to BGWORK for our printer

We use Pantone and RAL colour books

Please specify if full colour, black and white, single colour, colour matched (please provide a colour code, colours need to be matched to a physical sample, please allow time for matching)

Ceramic inks cannot guarantee complete accuracy in matching additionally the colour and thickness of the glass will affect the printed surface as will any light source.

Resolution:

All images/artwork to be 300dpi or greater
Images must be 300dpi when viewed at 100% (converting a lower resolution file to 300dpi will not improve the image).

Please note standard web images are only 72dpi and are not higher enough for print quality. Usage of such images may also be a breach of copyright.

Stock websites can provide higher quality images we recommended; istockphoto, shutterstock and adobe stock

Size of images should be no less than 2400px

Please do not scale images to size required.

Images taken from a phone will not have the quality needed. Use stock sites available or approach a photographer.

For custom illustrative designs please schedule some time to talk to our designer.

Samples:

A sample is provided with all jobs and has to be signed off on before production can continue.

Please allow for multiple samples and time for experimentation on complex projects.

If more samples and design changes are required fees may apply
